

Easypill® Joint Flex Cat

Chondroitin, Glucosamine, Osteol™ (a Bioserae Trade Mark)

The Easypill® concept

The administration of active substances by pets is often difficult. Thanks to the **Easypill® concept**, these substances are directly incorporated in bars/pellets specifically suitable for the taste of cats. Its excellent palatability allows a spontaneous intake by the animal.

Moreover, **Easypill® Joint Flex Cat** is low calorie and non-allergenic, and is suitable for all cats, even the most sensitive ones.

Category:

Complementary feed.

Objectives:

Easypill® Joint Flex Cat contains **chondroitin sulfate**, **D-glucosamine** and **Osteol™** (60mg/piece), a new isolated peptide from milk. They present synergic actions that help promote good joint care in your pet. Easypill® Joint Flex Cat can be administrated as soon as supplementation begins with Easypill® Joint Support Cat.

The highly palatable specific formulation of **Easypill® Joint Flex Cat** encourages a spontaneous intake by the animal.

Ingredients:

Chicken meal, glycerin, water, monopropylene glycol(*), glucose syrup, rice starch, appetite enhancer, D-glucosamine, Osteol™, fats, chondroitin sulfate

(*) Monopropylene glycol may be replaced by sorbitol in accordance with the regulation in your country

Additives/kg:

Soy lecithin (58 000mg), manganese sulfate (3 750mg), zinc sulfate (2 500mg), preservatives and antioxygen

In accordance with EU regulation n° 767/2009

Typical analysis:

Raw proteins: 27%. Raw fats: 11%. Raw fibre: 0.4%. Raw ashes: 10%. Moisture: 20.5%.

How to use:

Oral use.

Give for 1 pellet per day for 1 to 2 months, as required, 3 or 4 times by year, if necessary.

Preservation:

24 months from manufacture date

Store in a cool and dry place

Presentation:

Boxes of 60g (30 pellets of 2g)

Interests:

Chondroitin (50mg/piece) and **D-glucosamine** (75mg/piece) are well known for their ability to relieve pain and increase cartilage cells protection. **Manganese sulfate** and **zinc sulfate** are essential cofactors for articular metabolism.
